MODERN DECORATIVE MOULDINGS THAT EVOKE OLD WORLD CRAFTSMANSHIP

Accra Composite Mouldings (ACM) are a unique type of wood moulding that can be used in both traditional and modern interiors to add architectural interest. Created using modern technology the mouldings evoke an old world hand carved wood appearance but at a fraction of the cost.

The technology used combines solid wood mouldings and a wood pulp material. The pulp material is applied to a poplar base moulding and a stamp is pressed over it to create the pattern.

Composite mouldings are easily installed with conventional woodworking tools and are also ideal for:

- mirror and picture frames,
- decorative furniture / shelving accents,
- mantel surrounds and mantel caps.

Many of the mouldings in this collection combine nicely with mouldings from the Accra Designer Collection (ADM). For example, baseboard ADM257 pairs well with crown ACM5435. Even mouldings from different series within the Composite Collection mix nicely. This allows for a great deal of creativity in creating a look that is unique and appropriate for your home.
